Introduction

This document consists of all the new features, the upgrades and the known issues for release 5.4. Although all functionalities have been rigorously tested, please share unlisted items in Test Monitor. This process lists the unknown issue for future release. If you read about any features that are not available in your standard SFS360 platform configuration, please contact your SFS account manager so these configuration settings can be explored.

New features

1. The communication portal is extension of the normal mobile flow. The main purpose of the portal is to inform the airlines passenger of the current state of their flight. The passenger can also find needed documents in here and upload links to local documents to find them easily. The passenger can also share their flight status and updates with people.

2. It is now possible to directly start a skype call from the hotellist page. By clicking the phone skype is opened and the call can be made to the hotel.

Grand Hotel zum schonen Beispiel	☎ Phone +84983742025	ankfurt am Main	yes	14.3	2	200	BLD	€0,00	€0,00	€0,00	€0,00	0	0	0	0	0

Upgraded features

1. Total numbers of rooms on hotel details page now shows the correct number.
2. It is now possible to remove contacts from the add hotel page.
3. It is now possible to change the currency for a hotel both ways, without making mistakes.
4. self service is functioning again when group mode is enabled.
5. When multiple passengers are added manually the services are now added to all the passengers not only the last added passenger.
6. The zipcode on the mobile voucher is now placed on a logical place.
7. Problem solved in the language & text page. It is possible again to add new communication and change the name of the communication message.

Known issues

1. group handling: passenger doesn't see all available hotels on mobile

GDPR

No GDPR issues reported or changed
